## Partnership Tiers Program

2024 - 2027

The support of our Partners allows us to deliver on our organisation's objectives and offer our programs to students. Our partnership tiers are based on an annual contribution level and focus on providing our partners with the opportunity to:

- Show the students your company's world during the IAES week
- Talk to the students about career opportunities
- Be recognised for your commitment to Indigenous education and participation in the workforce
- Celebrate the achievements of the students

### About Engineering Aid Australia

The Indigenous Australian Engineering School program and its associated scholarship program (together IAES) are the principal activity of Engineering Aid Australia (EAA), is a registered charity and a Deductible Gift Recipient for Australian tax purposes.

### What are the Indigenous Australian Engineering Schools (IAES)?

EAA has conducted its Indigenous Australian Engineering Schools program since 1998. We currently run two schools each year, one in Sydney and one in Perth, attended by around 25 Senior High School students in each school.

Delivered in partnership with some of Australia's best universities, the IAES introduces students to university life, as they live on campus for the week, meet with academics and current students who are IAES alumni.

During and after the IAES program, we connect students with networks to support them on their journey through school and university and into rewarding careers.

This includes helping them to build relationships with our Partners, providing mentorship and scholarship support.

We will always continue with the IAES to show High School students what engineering is and how it can lead to rewarding careers, benefit communities and help to shape future society.

We aim to expand the program to assist more students in regional and remote locations as well as urban centres.

We seek to have a greater impact on improving the participation of First Nations people in the Engineering and STEM industries.

# EAA Partnership Tiers

## Overview 2024 - 2027

**Network Builders**  
\$15K or more + GST

**Program Developers**  
\$30K or more + GST

**Growth Partners**  
\$50K or more + GST

Be recognised for your commitment to First Nations education and participation in engineering, science, and technology industries:

- Co-host a site visit or an interactive workshop during the IAES with one or more EAA Partners.
- Send two or more engineering representatives to the Networking Function at each IAES
- Company representatives attend the Graduation Dinner at the conclusion of each IAES
- Receive 2 Newsletters per annum via email
- Recognition on Engineering Aid Australia website
- Permission to use IAES photos in Reconciliation Action Plan and Corporate Annual Reports.

In addition to the above benefits:

- Priority for hosting a site visit or interactive workshop during the IAES
- Priority for mentoring the IAES Extension program participants
- Support to host STEM work experience / internship placements during student school and university holidays
- Access to Job Board Portal on EAA Website
- CEO / Senior leaders able to attend Vice Regal receptions (subject to EAA receiving a reception for the students)
- Support for Reconciliation Action Plan (RAP) development, Employee Value Proposition (EVP) for First Nation employees in STEM and 'Employer of Choice' recognition.

In addition to the above benefits:

- Use of EAA logo
- Networking Forum for Program Leads
- Branding on IAES merchandise
- Priority for hosting and badging an annual EAA Thank You event in one city location
- Banner displayed at all events where possible
- EAA Endorsed Growth Partner badge.

# We are building futures

**Donate today to support Engineering Aid Australia**  
Donations \$10K + GST

- ⦿ Invitation to attend Partner Thank You events
- ⦿ Receive 2 Newsletters per annum via email
- ⦿ Recognition on our Engineering Aid Australia website
- ⦿ Permission to use IAES photos in Reconciliation Action Plan and Corporate Annual Reports
- ⦿ Opportunity to have two representatives at the Networking Function at each IAES.

## Jarod's Story - Jarod attended our IAES at the University of Sydney

Coming from an isolated Tasmanian town, I had never experienced anything quite like the Indigenous Australian Engineering School (IAES) before. The IAES gave me the opportunity to meet and learn from skilled professionals, visit sites and headquarters where innovations are made daily, and see first-hand the technologies and processes that shape the engineering industry. My perspective on engineering was broadened considerably as I was shown the inner workings of an enormous variety of jobs in the field. Every activity in the event was fun and useful. It was eye-opening to see how far a career in engineering can take students like myself. Thanks to the IAES, I have the confidence to study Software Engineering at the University of Sydney, and the knowledge and resources to be involved with the industry.
